

Radiant Technologies Inc. Announces Master Services Agreement with Terra Life Sciences

December 11, 2017

EDMONTON, ALBERTA and CALGARY, ALBERTA December 11, 2017 -- Radiant Technologies Inc. ("Radiant" or the "Corporation") (TSX Venture: RTI) announces the signing of a Master Services Agreement (the "Agreement") to produce cannabis extracts for the Terra Life Sciences group ("Terra Life Sciences"), a private, Alberta-based pharmaceutical manufacturer whose ACMPR license is expected in the near future.

Under the terms of the Agreement, Radiant will use its proprietary, microwave-based extraction platform and decades of extraction expertise to deliver "Extraction as a Service" to Terra Life Sciences. From its Edmonton facility, Radiant will process and refine Terra Life Sciences' cultivated cannabis material into permitted cannabis oil products at industrial-scale throughput and high yields, while maintaining rigorous quality and product safety standards.

With its subsidiary Olds SoftGels Inc ("OSG") and OSG's production capacity of over 2.5 billion softgel capsules a year from two GMP-certified facilities, Terra Life Sciences is well-positioned to develop innovative, pharma-grade cannabis and CBD-based products at scale, enabled by the economic and operational advantages provided by Radiant's platform.

"We are excited to be a partner in Terra Life Sciences' product development and value chain as they address the rapidly growing medical applications of cannabis and CBD-based products," said Mike Cabigon, COO of Radiant. "Furthermore, we anticipate a number of important synergies between the two companies as we address consumer needs."

Dr. Anil Jain, President and CEO of Terra Life Sciences, added, "Through the use of MAP™, Radiant has a proven, high value extraction system that will help bring to market a number of exciting products. It is important for us to solidify this relationship because it will provide us access to large scale extraction capacity for producing high quality pharma-grade medicine."

About Terra Life Sciences

Terra Life Sciences is a holding company with a subsidiary operating as Olds SoftGels Inc. The Terra Life Sciences group owns and operates two pharma-grade facilities with capabilities to manufacture pharmaceuticals, over-the-counter ("OTC") medications and premium grade nutraceuticals. Terra Life Sciences currently manufactures over 100 different products and has a manufacturing capacity of over 2.5 billion softgels per year, with access to an R&D department that includes 8 PhDs on staff. These facilities are licensed by Health Canada, inspected by US FDA and are fully GMP compliant.

Terra Life Sciences is in the final stages of securing its ACMPR license to enable the extraction of Active Pharmaceutical Ingredients from cannabis and to manufacture and sell pharma-grade

doses in various delivery systems. It offers excellence in manufacturing doses in various delivery systems such as softgels, liquids, topicals, sprays and liposomes, with capabilities for quick release, sustained release and targeted release of medicine. Terra Life Sciences is focused on scientific research and collaboration, and has plans to participate in clinical trials to fully explore the potential of cannabis for patient health, and to provide evidence-based products for the comfort of health practitioners.
